I'm fine with it even if it's not in English. It doesn't really matter to me, but I do like having a German dub. The British dub of the film, however, is not considered very good quality. In addition, some of the sound effects are quite odd, some of which are not at all appropriate to the story, like the helicopter. However, I'd recommend this version to any fans of old horror movies. This is a SQL Server 2008 question, but I believe there is an equivalent in Oracle. I've built a stored procedure that makes use of the OPENQUERY() command in SQL Server. This is the basic syntax for it: CREATE PROCEDURE MyProcedure (@SQL varchar(max)) AS BEGIN SELECT * FROM OPENQUERY(MyDB, @SQL) END I'd like to do something similar in Oracle, but I can't seem to find the equivalent. I don't really want to make a procedure in Oracle to do this. I'd like to reuse this stored procedure for other stored procedures in a larger database project. Anyone know of an equivalent function or statement in Oracle? Thanks. A: I think you might be looking for the EXECUTE IMMEDIATE command: SELECT * FROM OPENQUERY(MyDB, 'SQL') I think you are looking for this: SELECT * FROM table(YourDB.yourPackage.YourProcedure('@SQL')); House Republicans passed an ObamaCare repeal bill on Tuesday, and the upper chamber will now take up the legislation to formalize the process of repealing the controversial law. The House passed its ObamaCare repeal bill Tuesday, marking a 82157476af
